MATH AND STREAM

Dear OLA Jr. High Students,

Welcome to Junior High Math and STEM and sixth-grade Homeroom! I am thrilled to have you all in my classroom this year and am looking forward to diving into the exciting world of mathematics and STEM with each and every one of you.

In these courses, we will be exploring a wide range of topics, from algebra and geometry to physics and engineering. It is my goal to provide you with a challenging yet supportive learning environment where you can grow and excel in your understanding of these subjects.

I want to encourage you to ask questions, seek help when needed, and always strive to do your best. Remember, success in math and STEM is not about being perfect but about putting in the effort and being willing to learn from your mistakes.

I am here to support you every step of the way, and I am confident that we will have a successful and rewarding school year together.

You will find the supply list for all junior high students attached. Be sure that your math notebook is not spiral bound but composition style with graph paper. There are several 8.5 x 11 in options on Amazon that would be perfect. You will need at least three of these for the school year. I have attached a link as an example. <https://a.co/d/d3sXQ6p>

Once again, welcome to Junior High Math and STEM. Let's make this year a memorable and enriching experience for all of us.

Sincerely,

Mr. J Kuntz

Our Lady of the Assumption School
